

Task 1: Responsive Portfolio Website

1. Objective

The objective of this task is to create a responsive personal portfolio website using HTML5, CSS3, Bootstrap 5, and media queries. The website is designed to display personal information, skills, projects, education details, and contact information in a clean and professional layout.

2. Technologies Used

HTML5

CSS3

Bootstrap 5

Media Queries

Git and GitHub

Visual Studio Code

3. Features

Responsive navigation bar

Home section with name and introduction

About Me section

Skills section

Projects section

Education section

Contact section

Mobile-friendly design

Clean and professional user interface

4. Code Snippets

Important HTML and CSS code snippets are added below.

HTML Code Snippet:

Paste small part of your index.html code here.

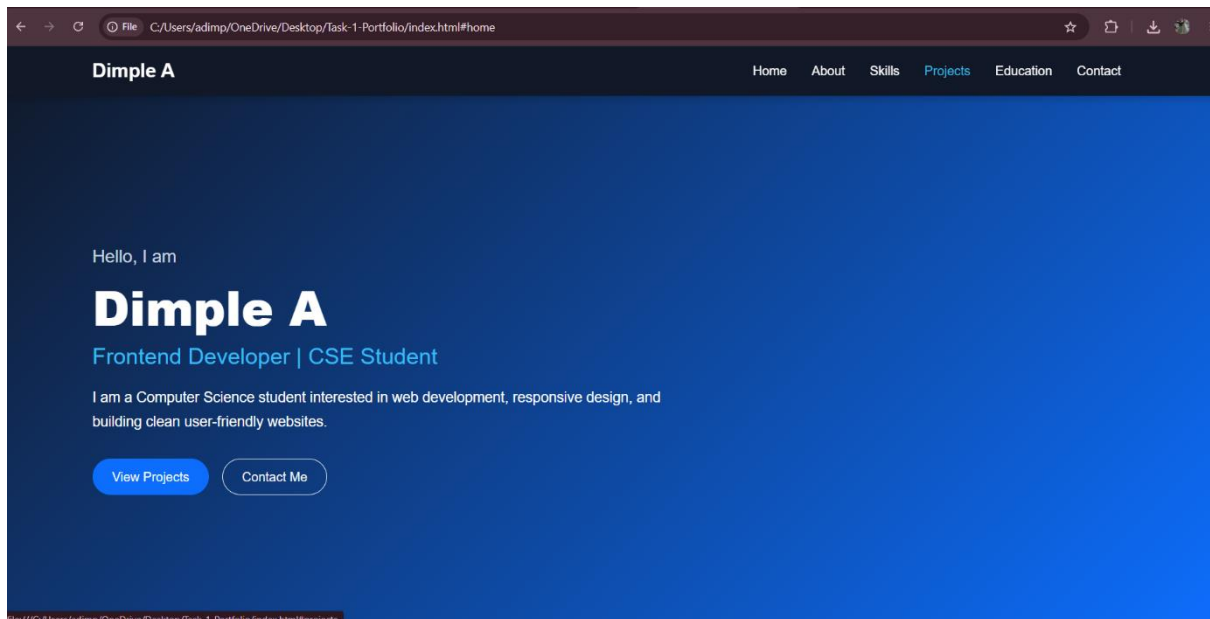

CSS Code Snippet:

Paste small part of your style.css code here.

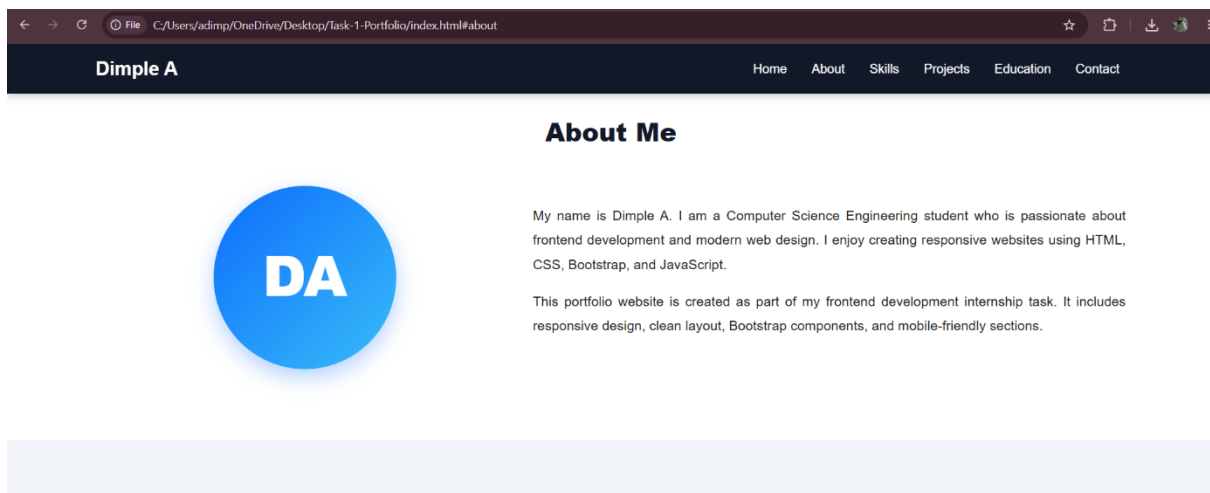

5. Screenshots

Add screenshots of the portfolio website below.

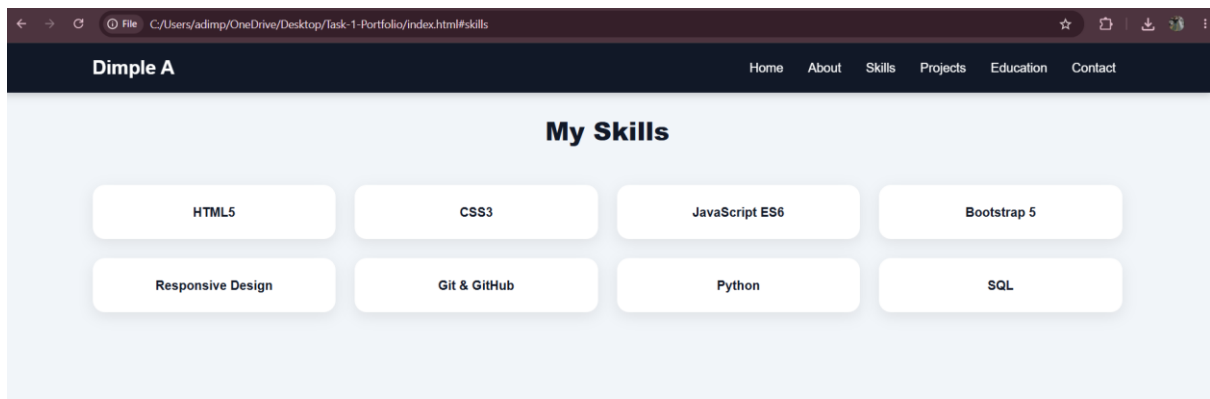

Screenshot 1: Home Section

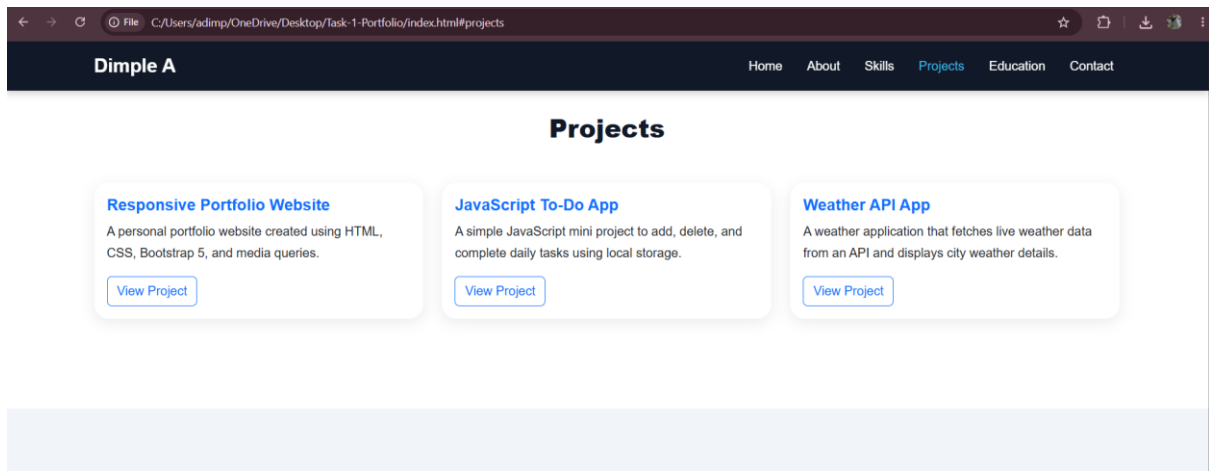

Screenshot 2: About Section

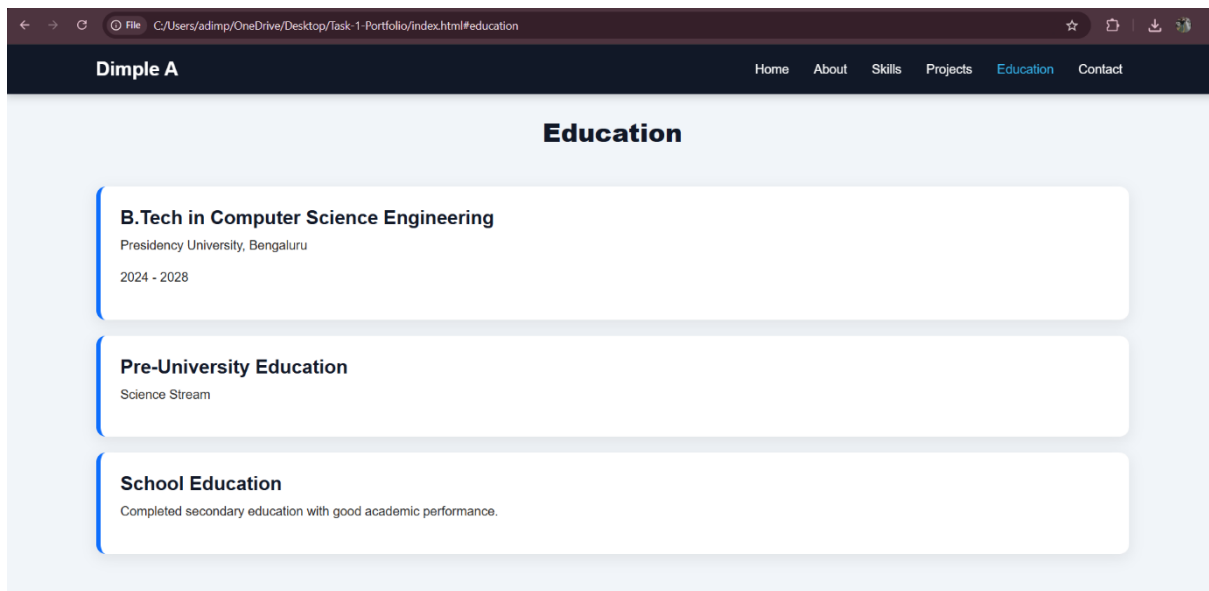

Screenshot 3: Skills Section

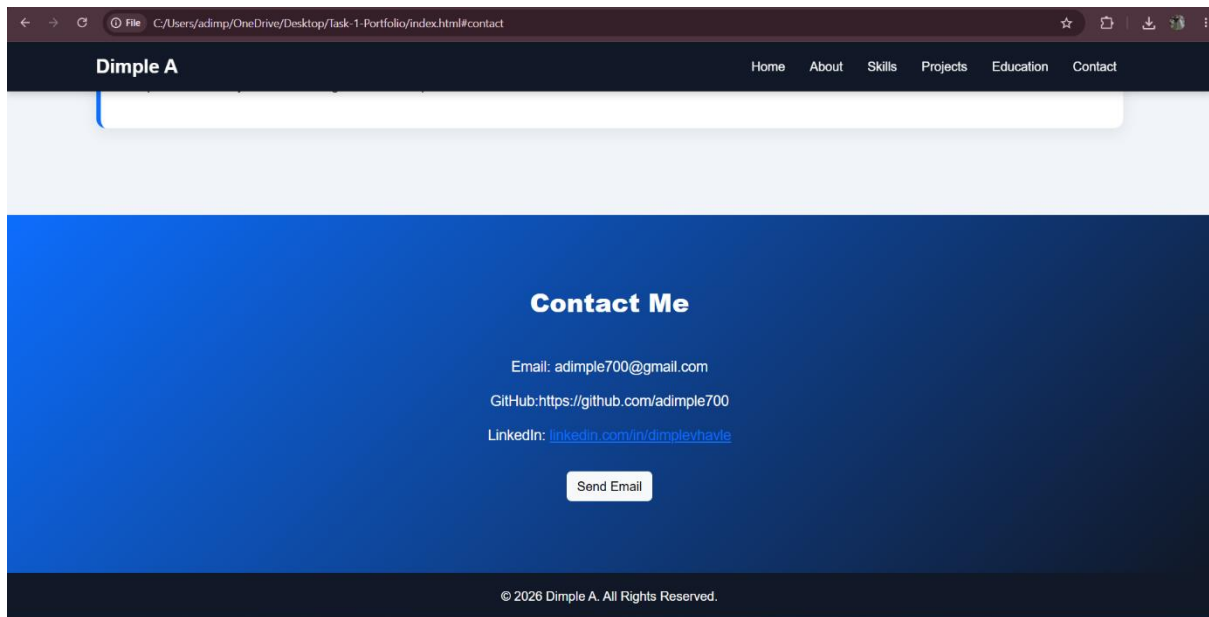

Screenshot 4: Projects Section

Screenshot 5: Education Section

Screenshot 6: Contact Section

6. GitHub Repository Link

Paste your GitHub repository link here.

7. Hosted Website Link

Paste your live website link here.

This task helped me understand how to create a responsive portfolio website using HTML, CSS, Bootstrap, and media queries. I learned how to design different website sections, make the layout mobile-friendly, and prepare the project for GitHub and deployment.
